

# Hosting Company Comparison

Do Your Homework

There's more to a website than disk space and bandwidth. Before you buy, make sure you dig below the surface to see what you're really getting.

Use this handy chart to compare iPage to the competition ...

	 iPage	Host 2:	Host 3:	Host 4:
Unlimited hosting	✓

Enhanced malware protection	✓			
Secure-site certification	✓			
Malware & spam protection	✓			
Free Domain	✓			
Wildly easy site builder	✓			
Online store and selling tools	✓			
Anytime money-back guarantee	✓			

# What Makes iPage Different?

## Security Suite

Exclusively through iPage. You'll get free account-specific malware and spam scanning, domain verification, and a security badge for your site. You'll also be able to run a full security scan on your account once per year.

## Support

We offer 24x7 phone, chat and email support. Calls are answered by North American agents in less than two minutes on average.

## Google Control Panel-Integrated

We've worked closely with Google to integrate the "Google Tools for Websites" into your hosting control panel. You'll have a single point of access for AdWords, your sitemap, site search and more.

## Scalability

iPage offers a wide variety of products, services and applications that will allow you to enhance your online presence and improve productivity. Offerings include Microsoft Exchange, different levels of shopping cart, and more.

## The Team

Our team has been providing shared hosting since 1995, and includes some of the founders of the industry. We're committed to an incredible customer experience (and the word-of-mouth referrals we generate by exceeding customer expectations).

## You Get a "Green" Website

Through the use of renewable energy credits, we're able to host websites that are 100% powered by wind energy, which means our customers have eco-friendly websites.

## \$105 Affiliate Payout

Through the iPage affiliate program, you'll earn \$105 for each new customer you send us. It's as simple as setting up a link on your website or email.

## Hosting Architecture

Your site is served by a pool of redundant servers, versus a single server and a backup server.
